Experiment 1- Create a kanban board(jira)

Aim: To create and simulate a kanban workflow using jira or trello.

Procedure:

1. Login to jira
2. Create a new kanban board
3. Create columns: To do, In progress, Done
4. Add 2 or 3 tasks
5. Move tasks across columns to simulate workflow
6. Observe task progress.

Result: Thus, the kanban board has been created successfully and simulated workflow by moving tasks across stages.
